

# H. TITLE INFORMATION

## PORSCHE FAHRER SPECIAL

# TURBO PORSCHE

by Jan Henrik Muche

### CONTENT:

Introduced during this years International Automobile exhibition in Frankfurt the new 911 Turbo "combines far reaching innovations in technology with fine tuning and supreme refinement in design" – a nice description for this excellent new model. The new sports car follows the principle of the first 911 Turbo: Make a lot out of very little. Optimize the relationship between cost and benefit. In short: Efficiency demands performance and it remains true today. The 911 Turbo principle is even more powerful, efficient and desirable than ever before.

No better reason for the chief editor of PORSCHE FAHRER to devote a special issue to this fascinating aspect of Porsche technology. Informative articles on groundbreaking and legendary models such as the Porsche 911 GT2, Porsche 968 turbo S, Porsche 924 GTP, the new Porsche 911 turbo and many more; practical information on importing a Porsche from Japan, buying a used Porsche 944 turbo or a detailed price-guide – although it's 'just a magazine special' this issue will surely make an impact.
