

H. TITLE INFORMATION

HEAVY GOODS ON THE ROAD

by Matthias Röcke

CONTENT:

Heavy goods transports are among the most spectacular logistics operations that can be observed on the road. No wonder that the usually impressively long and high loads, together with their powerful tractor units, always attract numerous onlookers and attract widespread media coverage.

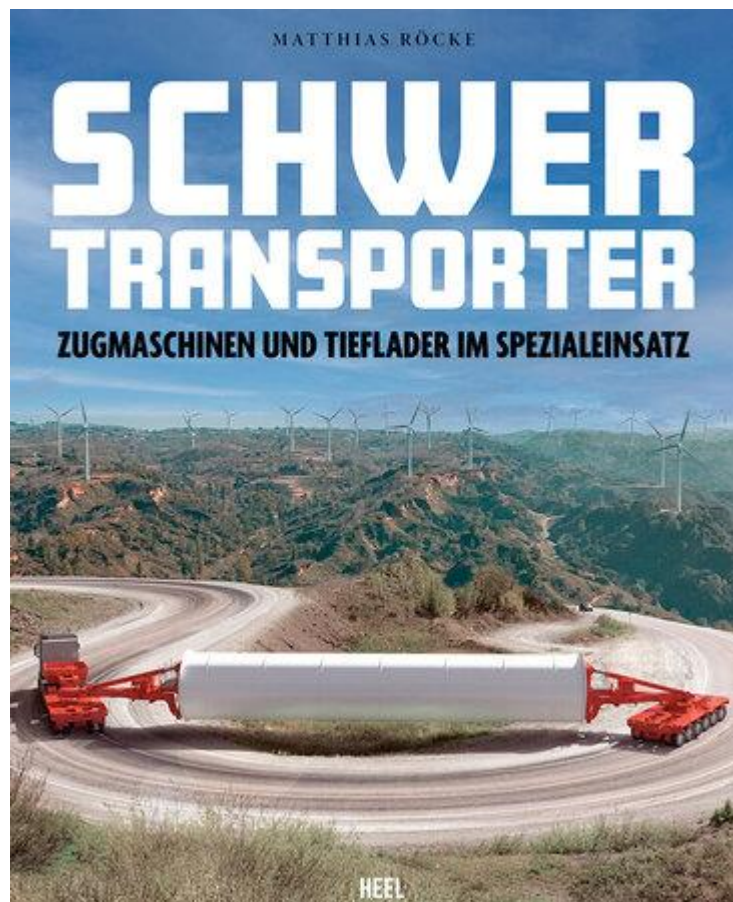

Specialized author Matthias Röcke presents the most interesting tractor units, low-loaders and self-propelled platform trailers designed for heavy haulage in detail, describes their special technology and design and takes an impressive look at the most spectacular heavy loads.

The volume is rounded off with a historical classification of heavy haulage as a technical challenge and a successful business model in the logistics sector.
