

H. TITLE INFORMATION

PORSCHE 911 CONVERTIBLES

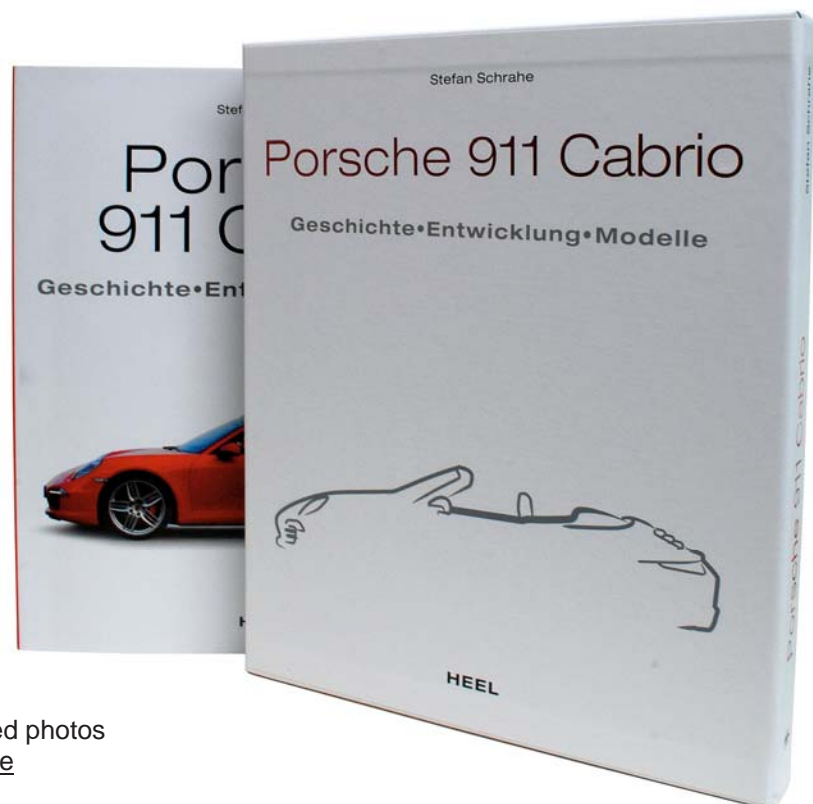

by Stefan Schrahe

CONTENT:

Thirty years ago Porsche began with the production of the first 911 open-top convertible. This was Porsche's first cabriolet since the 356 of the mid-1960s. It proved very popular therefore Cabriolet versions of the 911 have been offered ever since. Today the production of these iconic vehicles has matured; the models are up to date and fulfil anyone's expectations of being the most fun-to-drive convertibles on the planet.

To mark the 30th anniversary, the author has compiled a wonderful book on the history, the development and the various models of this open-top legend. It doesn't matter which of the many convertibles, roadsters or convertible coupes you are thinking of right now, whether the Porsche Spider, Speedster, Cabrio, Targa or Boxster comes to your mind – all open-air-models are illustrated with beautiful full colour photography.

The first book on a fascinating model range!

Rights all available
