

H. ADVANCE TITLE INFORMATION

CIVIL & MILITARY

AIRCRAFTS

by GERHARD SIEM

CONTENT:

This new volume in our bestselling series is essential to any aviation buff covering the amazing history and development of aircraft technology and its fascinating versatility. It features an up-to-date range of more than 500 types of aircrafts for both civil and military use. Starting with small sports airplanes it covers all the key civil aircraft types such as the Airbus A380, various helicopters, numerous military aircrafts as well as business jets.

Packed with more than 700 colour photographs of the various models it also offers the most important technical specifications to anyone interested in aircraft technology. An excellent and well-arranged reference guide for modellers and aviation enthusiasts alike.

Rights all available
