

H. TITLE INFORMATION

50 YEARS OF PORSCHE 911

by STEFAN SCHRAHE

CONTENT:

In autumn 2013 the legendary Porsche 911 celebrates its 50th anniversary. The success story of the 911 model family began in 1963 when Porsche introduced the Porsche 901. Since then it developed into much more than just a sports car: it is a cult item surrounded by many myths, inviolable and not comparable to any other sportscar of its class because of its superb original design and build quality.

This new book by Stefan Schrahe tells the complete story of the Porsche 911. From the drawing board and the people who invented it up to the current model, the author presents the continuous development of this dream car. He highlights the long list of successful motor racing events and gives a detailed overview on the technical specifications of the complete model range.

Illustrated throughout with splendid full-color photography, this book is the thrilling profile of a sporting legend!
