# FORD MUSTANG

## ALL GENERATIONS

by Tom Kettler

### CONTENT:

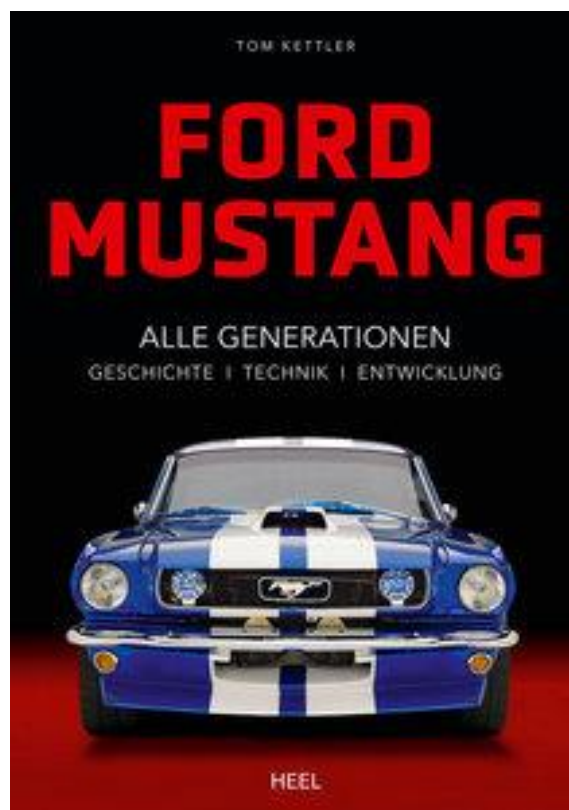

With the Mustang of 1964, the Ford Motor Company created the new species of compact yet powerful US sports car for family men, whose descendants continue this tradition to this day. While well-preserved examples of the early model series have long been traded at collector's prices, the American carmaker has managed to revive the cult of the Pony Car again and again with the more recent Mustang versions.

In this revised and updated volume from the editors of the German magazine *American Classics*, US-car specialist Tom Kettler presents all Mustang versions up to the new, seventh model generation in 2023. A wonderful coffee table book and a great gift!
